DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ward (US Pat# 3,310,131)

Regarding claim 1, Ward teaches a loudspeaker comprising a magnetic circuit, a voice coil on a bobbin, a diaphragm (1, 8 of fig. 3), a hollow portion in which an elongated can inserted and fixed by a support means (9) to diaphragm (1, 8 of fig. 3).

Regarding claims 5-9, Ward teaches the claimed limitations.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 and 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ward (US Pat# 3,310,131).

Regarding claims 2-5 and 10-11, Ward fails to put a restriction on the securing means in conjunction with the rod and would have been obvious to one of ordinary skill

Art Unit: 2643

in the art at the time the invention was made to incorporate any desired securing means for the purpose of holding the loudspeaker together.
